

Parkerson Mill Creek Cleanup
April 19, 2007 - Auburn University Earth Day
3 pm - Women's Softball Complex and Intramural Fields

Help us Clean the Creek!

Several groups on campus are working together to improve the health of Parkerson Mill Creek.

Be a part of our group:

☞ Trash Pick Up along the stream and streamside forest

☞ Removal of nonnative, invasive plants

☞ Native Vegetation Planting

Join us for an afternoon of good clean fun! First, get dirty planting native vegetation along the stream side and pulling up nasty invasive plants. Next, help us clean up the creek by picking up trash in the stream and along its streambanks.

Just show up - we'll have the plants, shovels, trash bags, and gloves!

Project sponsored by: IMPACT, Auburn University Sustainability Initiative, Donald E. Davis Arboretum, Alabama Cooperative Extension System, and others.
